

PlayStation 4 Installation Instructions

Step 1

With the backing still on the grip, test fit the grip to ensure & understand proper fit. Use the V-Cuts to find proper center alignment.

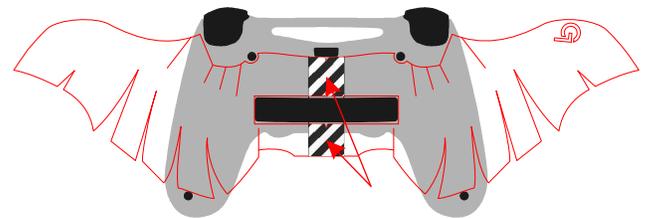

Step 2

Thoroughly clean the controller with Isopropyl alcohol. Allow the controller to dry completely.

Step 3

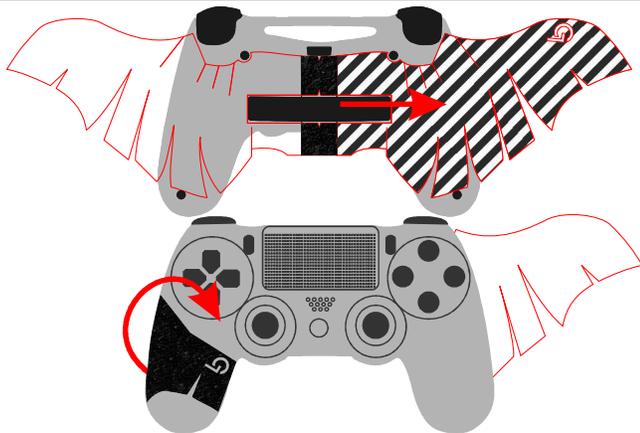

Remove the middle section of backing from the grip. Using the cutout for the serial number tag and the V-Cuts, align the grip on the bottom of the controller. The grip may be removed and repositioned as many times as necessary to ensure proper alignment.

Step 4

Next, remove the backing from one side of the grip. Roll the grip onto the controller working from the middle outward towards the edge. Lightly pressing the grip into place as you work from the middle around the side and on to the top. Repeat this process for the other side.

DO NOT STRETCH THE GRIP.

Step 5

Once the grip is in place, add the directional/button pad grips. Remove the middle section of the liner and use the cutouts for each to ensure proper alignment.

Step 6

Once each grip is in place, warm with a hair dryer and press firmly securing the grip to the controller.

Installation Tips & Tricks

- Be sure to thoroughly clean the grip area of the controller
- Warm only to the temperature of a warm cup of coffee
- Repeat warming and pressing focusing on all edges
- Enjoy your GamLokR
